

MICRO-FAB

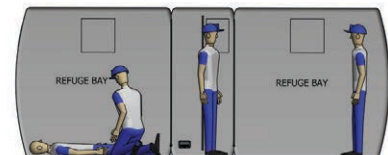

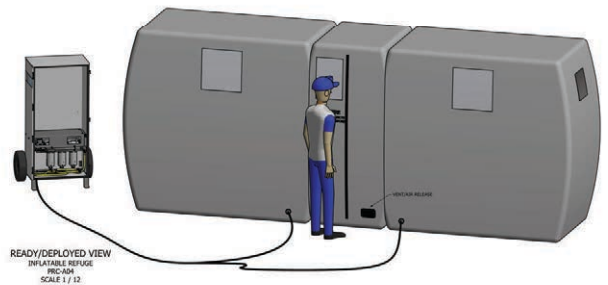

Inflatable Refuge Chamber

Emergency safety solution for underground work environments. Easily positioned by hand and attached to a compressed air source, this inflatable refuge chamber deploys quickly and provides a safe haven of fresh breathable air to workers.

SYSTEM BENEFITS

- Designed for short duration use
- Ideal for events such as equipment fires preventing underground evacuation
- Powder coated cabinet with wheels can be moved and positioned by a single person
- 8-person occupancy tent folded and stored in cabinet
- Rapid deployment and inflation using compressed air
- Airlock entrance and two main chambers
- Window fabric in airlock and main chambers for external viewing
- Requires 25-50 CFM input of breathable compressed air
- Three-stage Strata breathing air filtration system. Purifies air from external source before entering chamber
